

Dear Mr. Drechsler,

To be honest, I do not even know how to start this email, because there are no words to express how grateful I am to you and to the TO THE TOP WITH LAPTOPS Inc, for this award I received. So Thank you so very much.

Sometimes, many people told me that my hard work in high school was going to have a payoff but I always thought that there were many high school students that also did great things and so I was not expecting something like this.

I just could not believe that this was true, but here I am now, thanks to you writing this email from my computer.

I want to be very honest with you and let you know that as I am writing this thank you email I feel as if I was writing to a friend, so this is really me talking like I always do because I consider you a good friend. I mean who else would have done something like this for me other than a family member or a friend. So I tell you once again thank you so much for making me this happy and not only me but many other students. This act you do is a very admirable thing to do and I am very grateful and inspired by it.

I really hope that in a not so far away future, I can be able to do something maybe like this that will make someone as happy as this award made me. I want to think that I will always have a friend on you and so today I tell you that if is there anyway in which I can possibly help you, please let me know because I will be more than happy to do so at anytime. Once again thank you so much because you have given me one more reason to be happy.

Thanks again,

Lina Arboleda
