

Dear Prechsler Family,

I am Jessica Presedo. Last year I recieved a laptop from you at Yonkers High School. I just wanted to tell you how grateful I am.

Throughout this first semester at Binghamton University I have used the computer countless times. It is truly an integral part of my college life (along with the printer!) It was such a relief and joy when I won the computer. Your gift was so generous and really helped my family.

I really think your program is wonderful. I have seen articles online about your program and am awed by how many lives you touch. The laptop was such a help to my family and my academics and I know every other person who recieved a computer feels the same way I do.

I figure that I'll update you on my education. I made Dean's list and plan to major in math with a minor in Spanish (and you need a computer way more than you think!)

I am so grateful to your whole family and hope you continue your program.

Thank you so much, Jessica
